

I am adamantly opposed to FCC's relaxation of rules that restrict giant corporations from having a bigger monopoly over, not only art and entertainment, but the dissemination of news. It is unfair to the citizens of this country - and against public policy - to allow corporations to have greater control over (especially more than the existing unacceptable levels) the media presented to the public of this country. It is also against the best interest of working and aspiring artists to allow corporations to move toward a greater monopoly over the art and entertainment businesses in the USA. I wish to remind you that you and other federal governing agencies are in existence for the purpose of protecting the rights of individuals of this country -- NOT FOR THE BENEFIT OF CORPORATIONS!!! Thank you, Doreen Fisher
